High-Fidelity Prototype Script · v2.0 · English

For use in Figma Make / Stitch Every screen includes: structure, states, micro-interactions, real content, dialogs, and tokens

! CRITICAL LANGUAGE & CONTENT DIRECTIVE

ALL user-facing text, labels, buttons, copy, placeholder text, section titles, error messages, toasts, tooltips, navigation items, and any string visible on screen MUST be written in European Portuguese (pt-PT).

This application is designed for Angolan students and academics. The content language is non-negotiable. Do not translate, substitute, or anglicise any visible string. English is used only in this specification document — never in the generated UI.

Reference locale: `pt-PT` (European Portuguese, Angola context) **Example:** A "Save" button must render as **"Guardar"**, never "Save" or "Salvar". **Example:** A "Home" tab must render as **"Início"** in the navigation bar. **Example:** Error messages must read in Portuguese: **"Verifica os teus dados e tenta de novo."**

Semantic usage rules:

- `bordeaux` → primary actions, links, editorial highlights, active states
- `success` → correct quiz answer, action confirmation, "Concluído" badge, positive feedback
- `danger` → wrong quiz answer, form validation errors, critical alerts, destructive actions

- `warning` → approaching deadline, incomplete content, non-critical notices, intermediate level tag
 - `info` → study tips, neutral notifications, beginner level tag
 - `neutral` → all structural elements: text, borders, backgrounds, dividers
-

[Original topic text · pt-PT]

"A riqueza petrolífera transformou radicalmente a estrutura económica de Angola após a independência. Com a criação da Sonangol e o boom dos preços do crude nas décadas de 1970 e 2000, o país acumulou receitas significativas. Contudo, a dependência excessiva deste recurso levantou questões sobre diversificação, corrupção e desigualdade. O conceito de 'maldição dos recursos' pode ser aplicado ao caso angolano? Partilhem as vossas análises."

9. "China e Angola: Petróleo por Infraestrutura"
10. "O Pós-Guerra: Reconstrução e Crescimento (2002–2014)"

Body copy paragraphs

"Angola iniciou a exploração petrolífera em 1955, durante o período colonial português, na região de Benfica, nos arredores de Luanda. Contudo, foi somente após a independência, em 1975, que o petróleo passou a ocupar um papel central na economia nacional, financiando tanto a reconstrução como o esforço de guerra."

"A criação da Sonangol, em 1976, representou um marco histórico: pela primeira vez, o Estado angolano assumia o controlo directo sobre os seus recursos naturais. A empresa tornou-se não apenas o motor económico do país, mas também um instrumento de política externa e soberania nacional."

"O Kwanza, introduzido em 1977 em substituição do escudo colonial, viveu décadas de instabilidade. A hiperinflação dos anos 90, combinada com a guerra civil e a dependência das importações, erodiu o poder de compra das famílias angolanas de forma severa."

Quiz questions (pt-PT)

1. "Qual foi o principal objectivo da criação da Sonangol em 1976?"
2. "O que é a 'doença holandesa' e como se manifesta na Angola pós-petrolífera?"
3. "Em que ano Angola atingiu o pico de produção petrolífera?" (answer: 2010 — 1.79 Mbep/d)
4. "Qual o impacto económico do fim da guerra civil em 2002?"
5. "Qual a percentagem das exportações angolanas que o petróleo representa actualmente?"

Community debate titles (pt-PT)

1. "O petróleo foi uma bênção ou uma maldição para Angola?"
2. "Qual o impacto real das políticas do MPLA na economia (1975–1992)?"
3. "Kwanza e inflação: podemos aprender com o passado?"
4. "A parceria Angola-China: soberania ou dependência?"
5. "Pode Angola diversificar a sua economia sem petróleo?"
